Subject: Capitol One Data Breach Settlement

To the Court,

According to what I've read this Court made the ruling against Capitol One.

In early 2022 I received a notice that my personal information may have been compromised from Capitol One. Shortly after that I received a letter from the IRS that someone had filed a fraudulent 1040 using my information. I gathered up the needed information and headed off to the local IRS office. It took two trips to the IRS but I finally got things straightened out.

In May of 2022 I filed a claim against Capitol One and received a confirmation email from the Settlement Administrator that they had received my claim. According to the Settlement Administrator all claims had a deadline for submission by August 2022 which I met.

I waited 6 months with no settlement or any updates. I emailed the Settlement Administrator 6 times from November 2022 to April 2023 with NO response! I tried several times to call their 800 number and I might as well have called the Whitehouse to talk to Joe. In May 2023 I filed a complaint with the Illinois Attorney General's office which ended up being a waste of time. I ended up writing a letter and finally got a response [copy enclosed]. Seems a year isn't long enough to receive a settlement and I'm starting to wonder if this isn't some kind of scam against the elderly.

I've spent more time trying to find out what was going on than I spent filing a claim!
Can the Court shed any light on what is going on?

Respectfully,

William Dunkin
